

Cleaning & Maintenance Guide

ROUTINE CLEANING

Keep surfaces clean by frequently removing dry soil with a broom or vacuum. Brush or sweep with cool water using a broom or sponge squeegee. Surface is easily washed with soap and water. Mild soaps and other commercial detergents suitable for vinyl floors are usually effective. Never leave harsh detergents or chemicals on product. Built up soil may require mopping or scrubbing with a water solution containing a mild cleaner recommended for vinyl flooring. Do not drench or flood the floor as this will loosen the adhesive bond creating a hazard. BILD products do not require waxing or sealing, as it will negatively impact slip resistance. Mineral spirits is acceptable for use on difficult marks such as heel marks, crayons, paints, and inks. Ensure that any chemical residue is thoroughly flushed from the surface immediately after use.

BILD products are stain resistant, but not stain proof. Certain dyes, inks, rubber tires, and chemicals may cause permanent staining. Never use harsh chemicals such as tar remover or kerosene on this product as they can damage the surface.

CAUTION – SAFETY WARNING

Any floor surface may become slippery when moisture or debris is present. Proper care and cleaning of vinyl flooring will reduce the likelihood of slips and falls. Always wipe up any spills or fluids to prevent hazardous, slippery conditions.
